

Fleet Web Release Notes

April 11th, 2022

Fixes

- Various other bug fixes and performance improvements.

Improvements made on Classic Fleet

- All tab names seen in maintenance ('By Status', 'By Service Type', 'By Vehicle', 'By Group', 'Most Recent') have been changed to upper case to maintain the consistency in the letter case of tab names across the web application.
- Renamed the tab 'By Overdue' to 'By Status' on the Maintenance dashboard for clarity regarding how information is being sorted under this tab.
- Dynamic event selection - To have the capability to show videos of events based on what is selected in the videos listing in the Admin section.
- The ability to create Geofence from Live Maps.

For a more detailed explanation, please refer to the below-linked documents. Please reach out to fleet_products@azuga.com if there are any questions.
