

Fleet Web Release Notes

21st October, 2022

Latest update offers improvements, bug fixes, and better performance

Improvements

Following improvement has been made on Classic Fleet:

- The column 'Odometer' has been added to the Asset page and exported asset reports.
- IMEI column has been added to the Vehicles and Assets page.

Fixes

Minor bug fixes and performance enhancements.

Improvements

The column 'Odometer' has been added to the Asset page and exported asset reports.

The odometer reading for the relevant Asset Tracker is now displayed in the Asset Tracker Table under the Admin tab. Users can edit the asset to fill in the odometer reading. The Odometer's default value is set to zero; if the user modifies the value, it starts off at updated value and increments from there.

Users can find this odometer column in the Asset table under Admin tab and Exported Asset report.

The screenshot shows the Azuga Fleet Admin interface. The top navigation bar includes links for LIVE, SAFETYCAM, REWARDS, COACH, DASHBOARD, REPORTS, MAINTENANCE, ADMIN (highlighted), DEVELOPER, and ELOGS. Below this is a sub-navigation bar with icons for Vehicles, Assets (highlighted), Drivers, Devices, Groups, Config, Landmarks, Geofences, Alerts, Users, Roles, and Tags. The main content area is titled 'Assets' and shows a table of 14 assets. A red box highlights the ODOMETER column in the table.

ASSET ID	TYPE	DEVICE SERIAL NUMBER	IMEI	GROUP	MAKE	MODEL	YEAR	ODOMETER	TAG	LICENSE PLATE
0078755908		0078755908	007875590855901	Default Group				0

Forklift 8	Forklift	4643066160	270113184309640332	Barb's Cleveland	JCB	FL	2011	0		

Note: This feature improvement has now been implemented on both **Classic Fleet** and **Fleet 2.0**.

IMEI column has been added to the Vehicles and Assets page

IMEI column has been added to the Vehicles and Assets page. The IMEI number is neither editable nor visible when adding a form since it is relevant to the device, and not the vehicle.

Normally, this field is hidden by default but can be enabled using a custom column and displayed next to the Device Serial Number. Vehicles or Assets that do not have a device assigned to them will have the IMEI displayed as a dash (-).
