

Fleet Web Release Notes

May, 2022

Improvements

- Dynamic event selection - To have the capability to show videos of events based on what is selected in the videos listing in the Admin section.

Fixes

- Various bug fixes and performance improvements.

Improvements

Dynamic event selection

Capture and show videos other than the standard events based on dynamic event selection. The selected events will only be shown in the video listing.

The screenshot displays the Fleet Web Admin interface. The top navigation bar includes icons for Vehicles, Assets, Drivers, License, Devices, Groups, Config, Landmarks, Geofences, Alerts, Users, Roles, and Tags. The left sidebar shows a menu with 'Devices' selected, and sub-items: General, Live Maps, Dashboards, Reports, Maintenance, and Admin. The main content area is the 'Config' page, which is divided into several sections. The 'General' section includes settings for Currency (\$), Date Format (May-24-2022, 01:50 (12 Hour)), Distance Unit (MILES), Fuel Unit (Gallons), Speed Unit (MPH), Mileage Weightage (%), Job Creation Type (Advanced), Default Map View (Map), Temperature Unit (Celsius), ReverseGeocode Option (Google), Session Max Idle Time (1 Hour), and Show value upto Decimal Places (2). The 'Web-app Versions Allowed' section is set to 'Classic Fleet'. The 'Add-on Event(s) For SafetyCam' section is highlighted with a red box and contains four options: HARD_ACCELERATION_MESSAGE, HARD_BREAKING_MESSAGE, HARD_CORE_BRAKING_MESSAGE, and CAM_BUTTON_PRESSED. The 'Add-on Event(s) For SafetyCam AI' section is also highlighted with a red box and contains one option: CAM_TAMPERED. The bottom section includes settings for Cost per distance (0.71), Cost per distance hybrid (0.60), Default fuel cost (2.4), Default Map Location (39.57182, -102.758), Attachment Size for Messaging (5 MB), Days weightage for score Average (10), Maximum TrackMe Duration (60), Live Stream Duration (10), Maximum tags allowed per object (5), and Tags Quota (25).

- SafetyCam: Will record video for any of the events mentioned/selected dynamically
- AI SafetyCam: Will record video for any of the events mentioned/selected dynamically
